Keywords: Andhra Pradesh, Arunachal Pradesh, Assam and Bihar.

Introduction

For sexually abusing children Women use the Internet It has come to public light. So breaking the barriers around female sex offenders, to understand this growing problem it is important to examine the available sources. The purpose of this article is to how women in online child sexual abuse is to be investigated the accused; this issue has not received any scholarly attention so far. Searches during several investigations by the Indian Metropolitan Police at the collected ethnographic data we address this omission. Our case study is comprehensive Based on the study, in a less explored social phenomenon and generate some initial insights for its future study we try to raise questions. The prevalence of online child sexual abuse and empirical generalization over patterns we're not trying to. On child sexual abuse Academic studies in the context of positivist methodology approaches to this goal although dominated by research, On abuse of women online To start the discussion There is a clear case. Understanding female online offenders and experiences of their actions definite knowledge is not present. of the major academic literature Based on the review, Although associated with male sexual aggression, Child sexual abuse is common, It is more correct to implicate women as criminals not understood, Especially in relation to emerging forms of online abuse. Male and female offenders In the criminal justice process is involved and including interviews with experts By examining multiple qualitative data We affirm this contention. Many parents they think it is perfectly safe to let their children use the internet at home. It's unbelievable, because kids can communicate with anyone anywhere in the world through the internet. Children in the Digital Age "Privacy", "Exposing Inappropriate Content," Like "money laundering" and "child grooming". They face various difficulties and risks. To ensure internet security although there are many measures, Protecting children from technology cannot be protected. Cybercrime is personal, Public or corporate information an attack on It is available online for an individual or business Occurs in a virtual environment. Information gathering, communication, Messaging, letters, Court summons and including emails Social networking sites for various purposes Used by people all over the world. Due to modern advancements in technology, in schools and colleges all classes now even during the lockdown period Conducted online. Even small children you can benefit from using technology. Parents mostly of their children they will not be aware of actions. Children in society the most vulnerable are the members and are often exploited online. Sexual Exploitation of Youth on the Internet It has become apparent recently. Online discussions with teenagers, Deceived about their age by abusers, are used to lure them into sex. Modern, sophisticated technology for fraudsters makes communicating with children much easier. Young and attractive Apart from being they are particularly vulnerable, because they are mostly for networking depend on social media platforms. To meet victims in person Criminals in online networks creating false identities. As a result, including "sex tourism" and "human trafficking". Cases of child abuse and exploitation have increased. Who the child is talking to is a mystery to them. At last meeting and talking to an old man of forty or fifty years, they know what they are talking about. Due to the publication of obscene pictures on social media many children commit suicide. Children tell

your parents about this mistake They delay. But by doing so and there will be no problem. By using the internet those who are taken advantage of, consequences of their abuse throughout their lives are forced to face. Additionally, It is a collective of children It also affects mental development. Children about this mistake they delay telling their parents, But by doing so and there will be no problem. By using the internet those who are taken advantage of, consequences of their abuse are forced to face throughout their lives. In addition, it affects the overall mental development of children. In the real world Protecting children Importance As we all know; however, parents and grandparents their children equally important is protection from online dangers. Protecting your children from cyberbullying as a parent you have an important role to play. Appropriateness of technology and about inappropriate apps Gone are the days when parents and adults took an active role in teaching their young children. Regarding cybercrime involved in a case it is difficult to arrest the culprit, because the culprit is on the planet Crime can be committed anywhere. Catch criminals today need help from Cyber Cell Police Station them as they use advanced technology.

Crime against children in India by online

In the twenty-first century a child every day also spend hours playing online video games also spent surfing the internet. On the Internet, They are numerous Opportunities abound they face various risks. As they lack the specialized expertise required, Digital technology and RISKS OF USING THE INTERNET OR They cannot assess threats. They may be completely blind to dangers. Children unknowingly confidential information may be leaked and effects in various ways they can express themselves. They include "social engineering," "cyber bullying," "hacking," "viruses," "bad malware," "Cyber stalking" and search engines, Online Marketing and social networking Similar to websites May fall prey to other cyber security threats. However, of a company As internet presence increases The risk of cyber attacks increases, Children than other groups, Especially for such attacks are affected. Many parents they think it is perfectly safe to let their children use the internet at home. It's unbelievable, because kids can communicate with anyone anywhere in the world through the internet. You can communicate with anyone anywhere in the world. Children in the Digital Age "Privacy", "disclosing inappropriate content", they face various difficulties and dangers like "money scams" and "child grooming". Although there are many measures to ensure Internet security, Technology cannot protect children from harm. Cybercrime is a personal, an attack on public or corporate information. It is available online for an individual or business Occurs in a virtual environment. Information gathering, communication, Sending messages, letters, For various purposes including court summons and emails Social networking sites are all over the world are used by people. Due to modern advancements in technology, in schools and colleges all classes now conducted online even during lockdown. Even small children you can benefit from using technology. Parent's actions of their children often unaware, Children are very much in society vulnerable members And mostly online are exploited. Sexual Exploitation of Youth on the Internet It has become apparent recently. Online discussions with teenagers, Deceived about their age by abusers, are used to lure them into sex. Modern, sophisticated technology makes it much easier for fraudsters to communicate with children. Besides being young and attractive, they are particularly vulnerable, Because they mostly rely on social media platforms for networking. To meet victims in person Criminals create false identities in online networks. As a result, including "sex tourism" and "human trafficking". Cases of child abuse and exploitation have increased. Who the child is talking to is a mystery to them. At last meeting and talking to an old man of forty or fifty years of age, they realize what they are talking about. Due to the publication of obscene pictures on social media many children commit suicide. Children tell this mistake to their parents delaying, But by doing so and there will be no problem. By using the internet Those who are taken advantage of, consequences of their abuse to face for the rest of their lives They are forced. Additionally, it affects the overall mental development of children. We all know the importance of protecting children in the real world; however, it is equally important for parents and grandparents to protect their children from online dangers. As a parent, you have an important role to play in preventing your children from becoming victims of cyberbullying. About appropriate and inappropriate uses of technology Gone are the days when parents and adults took an active role in teaching their young children. In case of cybercrime it is difficult to arrest the culprit involved, because the culprit is on the planet Crime can be committed anywhere. Because criminals are using sophisticated technology in today's era the help of Cyber Cell Police Station is needed to catch them. Published by Hindustan Times on September 16, 2021 According to an article, Total number of cognizable cases increased by 28%, but compared to 2019 the number of new cases has decreased. It is related to covid Takes violations out of the equation. Number of kidnapping and kidnapping cases decreased by 19.3%, at the same time against women Crimes fell by 8.3%. Offenses against minors decreased by 13.2%, Crimes against the elderly 19.3% down (down 10.8%). of the total number of murders A % increase. On the other hand, related to cybercrime Registered under Rules Number of complaints It has increased to 50,035 from 44,735 in the previous year.

Data Collection

The objectives of this article are exploratory. Its child sex offenders and trainers by analyzing a range of qualitative data on their respective perceptions and Experiences are outlined Knowledge gaps trying to address. The data presented here is variously primary and derived from secondary sources. On the current state of knowledge about online sexual offenses against children providing important insights. Our argument is about online child sexual abuse cases Based on analysis of police reports. This is confidential And very important Access to documents subject to appropriate background checks Then duly delivered. Regarding online sexual abuse Collected in conducted research Accounts of online sex offenders are presented here. These data sources Triangulation are important online child sexual abuse and provides unprecedented insights. Number of documents received by us clearly defined the purpose of our dataset. From 2017 to 2021, crimes against child including rape, abduction and kidnapping, other crimes against girls from abroad, crimes against children including child rape, child

abduction and kidnapping and infanticide, incitement to suicide, exposure and abandonment, Crimes against children such as procuring minor girls have been used for prostitution and other violent crimes such as murder, theft and robbery, cybercrime and human trafficking. 2021	.907**	.785**	.940**	.916**	1

Table 4 shows the correlation between motivation parameters for 2017. For tax planning is having highest correlation with 2021 and having lowest correlation with 2020. Next the correlation between motivation parameters for 2018. For tax planning is having highest correlation with 2020 and having lowest correlation with 2019. Next the correlation between motiva-

tion parameters for 2019. For tax planning is having highest correlation with 2017 and having lowest correlation with 2018. Next the correlation between motivation parameters for 2020. For tax planning is having highest correlation with 2021 and having lowest correlation with 2017. Next the correlation between motivation parameters for 2021. For tax planning is having highest correlation with 2019 and having lowest correlation with 2018. Results Of The Analysis:The results of the estimates of the growth rate of Crime against children in India by family members and other crimes in various states in India, using 2017-2021 annual growth rates, are discussed in Tables 1. And relative performance by States and Union Territories at the all-India level in terms of crimes against children, crimes against women and other crimes is presentedCorrelations in Table 4. The ranking of states on the basis of crime against children Tamil Nadu was highest file in 2021.

Conclusion

The present paper is primarily a preliminary study of this subject, it draws attention to its importance and potential importance for future research raises several issues. Women are guilty of online child sexual abuse, Available evidence suggests that inducers, Assistants and Participants. This conclusion is academic literature and the empirical evidence we have gathered emerges from both. Limited resources available considering the nature, it is through further research to be proved. However, for women There are different motivations our preliminary findings suggest, they may actively participate in online child abuse, they may force or May promote child abuse, and they facilitate male abuse can play a significant role. Child Intelligence is an excellent resource for evaluating information on the Internet. In most situations, Parents of their children are legally responsible for the conduct. Parents should educate children about abuse, pornography, hate literature, Excessive force and other issues that scare them so they know how to react when they see dangerous content. A private internet service should have family planning features. Children have their name; address, phone number, password, school name and including parents' names Do not disclose any sensitive information online. Kids to meet someone they met online never decide, and uses abusive or threatening language, For any emails that seem strange or embarrassing They should never respond. In short, online child sexual abuse by female perpetrators a clearly significant, But surprisingly It is an underdeveloped field of research. The present article is on this issue tried to attract attention and To better understand the gendered nature of online child sexual abuse and empirical research and for ideological debates It raises some questions.
